

1 Hello, glossy!

In modern web development, languages like *Hypertext Markup Language (HTML)* and *Cascading Style Sheets (CSS)* are essential.

Now make sure I get your *TPS* reports by 2pm!

TPS is defined as: *A document on how to run all the test procedures.*

2 Examples with modifiers

Input	Output
@tps:short	<i>TPS</i>
@tps:long	<i>test procedure specification</i>
@tps:both	<i>test procedure specification (TPS)</i>
@tps:long:cap	<i>Test procedure specification</i>
@tps:long:pl	<i>test procedure specifications</i>
@tps:short:pl	<i>TPSes</i>
@tps:both:pl:cap	<i>Test procedure specifications (TPSes)</i>
@tps:def	<i>A document on how to run all the test procedures</i>
@tps:desc	<i>A document on how to run all the test procedures</i>

2.1 Using conflicting modifiers (short, long, both)

These modifiers are semantically mutually exclusive, by they can be combined syntactically. When multiple are used, glossy tries to make a smart choice on which one to display.

Input	Output
@tps:short:long	<i>test procedure specification</i>
@tps:short:both	<i>test procedure specification (TPS)</i>
@tps:long:both	<i>test procedure specification (TPS)</i>
@tps:short:long:both	<i>test procedure specification (TPS)</i>

3 Glossary

TPS – test procedure specification: A document on how to run all the test procedures 1

3.1 Web

CSS – Cascading Style Sheets: A language used for describing the presentation of a document . . . 1

HTML – Hypertext Markup Language: A standard language for creating web pages 1

4 Glossary with just empty group

TPS, test procedure specification: A document on how to run all the test procedures (pp. 1)

5 Glossary with just Web group

CSS (Cascading Style Sheets) · A language used for describing the presentation of a document 1
HTML (Hypertext Markup Language) · A standard language for creating web pages 1
